## **SUPERVISION OF THE ARMOURY**

Casar is a global solution designed to simplify the management and storage of weapons and equipment for national and local police forces.

# COMPUTERISED EQUIPMENT MANAGEMENT

The Casar solution provides centralised, streamlined armoury management with functionality tailored for armourers, officers and management. Its interface facilitates the traceability of lethal and non-lethal weapons, equipment entry and exit operations, anomalies, maintenance operations and inventories.

## COLLECTION AND REINTEGRATION OF EQUIPMENT

- Computerised control of individual and collective safes
- Authentication of weapons and equipment
- Detection of the presence of weapons
- Scenarios adapted to the operation of the armoury

## TRACK EQUIPMENT MOVEMENTS

- Daily statement of incoming and outgoing materials
- Real-time consultation of collection and return movements
- Dematerialisation of registers
- Remote control of locker opening
- Monitoring of anomalies

## MONITORING OF AGENTS AND USERS

- Secure employee identification (badge or biometrics)
- Access tracking and history
- Monitor agent authorisation information
- Configuration of authorisation profiles
- Allocate weapons to a locker and an agent

## MAINTENANCE AND ASSET MANAGEMENT

- Incident and equipment maintenance management
- Daily inventory referencing
- Traceability of maintenance operations
- Visibility of equipment listed and in stock
